Title

```
#Github Connection and Usage usethis::use_git_config( user.name = "Revarlas", # <- change to your
name user.email = "c.hassler92@gmail.com", # <- and your email init.defaultBranch = "main") # <-
not necessary but kinder than 'master'
```

```
usethis::use_git()
```

```
#Create and set Token for this computing environment usethis::create_github_token(description = "Token
for Repro Workshop 2023 Test")
```

```
gitcreds::gitcreds_set() # <- Token must not go into brackets, paste when asked
```

```
#Verifying everything is in order: usethis::gh_token_help()
```

```
#Upload to public GitHub Web usethis::use_github()
```

```
#Unused command for private upload: usethis::use_github(private = TRUE)
```

```
#moving on to package "repro" repro::automate() repro::automate_docker(path = ".") repro::use_gha_docker()
```

The dataset we use stems from the Bank of England Research datasets.

I quote:

This dataset contains the individual responses to our *Inflation Attitudes Survey*, a quarterly survey of people's feelings about inflation and other economic variables like the interest rate.

For this dataset the Bank of England asked 220.846 people for their opinion on the perceived and expected inflation. The survey has run quarterly since 2001.
